UNIVERSAL SCREEN MAGAZINE

Issue No. 31.

Released August 10—

Rose breeding is the subject of the first part of the Screen Magazine, Issue No. 30. The second subject is a demonstration of a new motor for an airplane, which is so constructed that the propellers perform the double function of driving the machine at top speed and at the same time cooling the motor.

Screen oddities are represented by the tricks of some bears, which have been trained to be pets.

"Going to sea in an armory" is the next study, and shows the preliminary training of sailors on land, before they ever see a battleship. These pictures were taken in the armory of the Second Battalion of Naval Militia at Brooklyn, New York.

Physical culture for women is more important than ever now that women have to take the place of men. Fine exercises are illustrated by experts for the Screen Magazine.

The last subject is a "miracle in mud" by the Screen Magazine's sculptor, Willie Hopkins, called "The Darwin Theory Upset."

This document is from the Library of Congress  
“Motion Picture Copyright Descriptions Collection,  
1912-1977”

Collections Summary:

The Motion Picture Copyright Descriptions Collection, Class L and Class M, consists of forms, abstracts, plot summaries, dialogue and continuity scripts, press kits, publicity and other material, submitted for the purpose of enabling descriptive cataloging for motion picture photoplays registered with the United States Copyright Office under Class L and Class M from 1912-1977.
